

browser options

HOOK ON BASE SCREEN

A simple hook on cover for the front of the browser base to create a storage area. Available in both steel and beech finishes. Also available with locks.

SINGLE SIDED END PANELS

A 2 part panel set to finish exposed ends of browser runs. Available in steel and beech finishes for both standard and slimline depth browsers.

DOUBLE SIDED END PANELS

A 3 part panel set to finish exposed ends of double sided slimline browser runs. Available in steel or beech finishes.

REAR PANEL SETS

A 2 part panel set to finish the back of a single sided browser. Used where the back of a browser is exposed, such as against a glass wall. Available in steel or beech finishes.

ARCHED FEATURE END

Used as an alternative to double sided end panels for our slimline browsers. The slatted panel format allows the use of our standard slatwall shelves for additional display.
