

options browser

SLATTED FEATURE END

Used as an alternative for finishing double sided standard browsers. The slatted panel format allows the use of our standard slatwall shelves for additional display.

CURVED FEATURE END

An all steel constructed curved display for the end of double sided browser runs. Normally used together with end panel sets and available for standard depth and slimline browsers.

CD AND DVD EXTENSION

An optional full width browser extension available in 3 shelf CD format or 2 shelf DVD format. Suitable for face on display of media.

NON-SLIP MATTING

Full width rubber matting for use in the browser trays. Popular with libraries as browsing noise is reduced.

HEADER FRAME OPTIONS AND HEADER CARDS

All browsers can be supplied with either a full width header frame or raised half width version. Full colour headers are available, manufactured to clients specification of colour, font colour, font and wording.
